Troop 928 has families from all over. They bring knowledge and experiences from all over the world. And along the way, a few good recipes. Friends and relatives agree that you may have these secret recipes only on one condition. That you add your own and pass on the total to others.

Eat hearty and happy camping.

Highly recommended reading for Parents, Leaders, and grommet Scout cooks and eaters:

### **Camp Cookery for Small Groups, Arthur J. Walrath, ed., 1967, BSA**

Eating well is not just part of the fun of camping. It is important to eat well to replace the energy used in the hiking and activities that busy Scouts are prone to do. High fluid intake and high caloric intake are needed. Seasonal changes may demand over 3,000 calories per day. The food pyramid is a guide for meal planning. The Pyramid can change with camping. The high calorie diet of campers use more fats during colder weather. Try to take the bulk of the food from the carbohydrate group.

We have tried not to duplicate the many books available on camp cooking (see additional reading list). We have tried to place our own stamp

on the type of cooking that our troop does, but do not limit yourself to the recipes, invent

your own. The following tables are for the adventuresome who would like to try different things. Great, but try them at home first, not 20 miles out on the trail.

Take special note of any dietary needs of the Scouts and adults. Allergies to foods are common.

**Don't forget the duty roster.** It will save time on determination of whose turn to do what.

## Cooking at Altitude with attitude

The boiling point of water decreases with increasing elevation due to decreasing air pressure. The boiling point of water decreases 1 degree C for each 1,000 feet of elevation. Cooking times increase with increasing elevation at 6,000 feet to about 125% of the time needed to cook at sea level. Time is dependent on the type of food and the method of cooking.

Altitude	Fahrenheit	Celsius
Sea Level	212	100
2,000 ft	208	98
5,000 ft	203	95
7,500 ft	198	92
10,000 ft	194	90
15,000 ft	185	85

Very high altitudes may increase boiling times to 30% more than at sea level. Therefore quick cooking foods such as minute or quick rice and instant noodle soups are easier to use than raw foods.

## Clean Sweep - Food Safety Tips

The biggest party crasher at summer picnic and camp outs is food borne bacteria. You can't see them, you can't taste them - but you sure can feel them if illness occurs hours or days later.

Each year about one in every ten Americans has an illness caused by food. Most of these cases result in simple stomachaches or diarrhea. If you prepare and then store foods properly, they will never leave their calling card behind. It's up to you to select, store, prepare, and then serve safe foods for you and your family. The most important steps to keep these uninvited guests away are very easy to do.

## The Golden Rules Of Food Safety

**ALWAYS WASH YOUR HANDS BEFORE AND AFTER HANDLING FOOD.**

**ALWAYS WASH YOUR HANDS AFTER USING THE REST ROOM, etc.**

When preparing food, keep surfaces and utensils clean. Use one cutting board for raw meats, another for fruits and vegetables that won't be cooked. **WASH YOUR HANDS BETWEEN EACH TASK!**

Keeping a clean kitchen area saves on cleaning up after the meal and keeps food related illnesses at a minimum. A clean heavy plastic sheet can declare kitchen boundaries.

**Read the preparation directions twice before beginning.**

- **WASH YOUR HANDS**

- Pick up trash as you create it.
- Soak pots and pans after using, Saves on that stuck on food mess after the meal.  
A simple trick is to fill dishpans with hot, sudsy water. This serves two purposes for me.

When preparing food, you can toss the dirty dishes into the hot water to soak while you cook. This makes for easier cleanup.

As you cook, stick your hands in the water to clean.

- **Keep cold food cold and hot food hot.**
- 140 degrees F or above and 40 degrees F or below. Do not leave food at room temperature longer than 2 hours (1 hour when summer room temperatures are hot). Thaw foods in the refrigerator, not on the counter. Also make sure that meat juices can't drip onto other foods. To store hot foods, refrigerate immediately in shallow containers to cool them more quickly.
- Keep chicken and chicken products, juices away from other foods.
- Clean cutting boards between each use.
- Be considerate of the cleaning crew while cooking, your next on the duty roster.
- Clean the dishes with soap, sanitize, rise **all** the soap off.
- Put utensils and pots back in the right places.
- **Keep dry items dry**, Don't place wet towels in with the dry goods.

- **WASH YOUR HANDS**

**ALWAYS SERVE FOOD ON CLEAN PLATTERS.** Now, you are probably thinking - "I know that! Why are they saying that to me?" But think? Have you every taken raw meat to the barbecue on a plate and then put the cooked meat back on the same plate to serve? Don't do this unless you have washed the dish in between. Raw meat has bacteria that will spread to the cooked meat.

**IF IN DOUBT, THROW IT OUT!** If you have any question in your mind about the freshness or safety of eating a food product, throw it out. It is better to be safe than sorry!

**Cook all the Food.** Leftover raw meats spoil faster than cooked meat.

### **Why is this more of a problem in camping?**

Did you pack the refrigerator? Temperatures are harder to control in the out-of-doors. Too Hot or Too Cold are what the campers say, But not your food. Camping temperatures usually range in the ideal temperatures for bacteria growth. Also Bugs and Dirt are naturally at home at the campsite.

## Salmonella and Food Safety

Chicken, turkey, pork, beef, and other meat and poultry products are important sources of protein and other nutrients. Unfortunately, these foods -- like eggs, raw milk, and all raw foods of animal origin -- may also carry salmonella and other bacteria. The good news is that these bacteria don't have to cause illness. Routine food safety can destroy salmonella and other bacteria.

**Hamburger and any ground meat has increased surface area and a increased risk for contamination.**

### What is salmonella?

The salmonella family includes abbot 2,000 different strains of bacteria, but only 10 strains cause most reported salmonella infections. Strains that may cause no symptoms in animals can make people sick, and vice versa. A salmonella bacterium is a one-celled organism that can't be seen, touched, or tasted. The bacteria are common in the intestinal tracts and waste of livestock, poultry, dogs, cats, rats, and other warm-blooded animals.

### What is salmonellosis?

Salmonellosis, or a salmonella infection, is the illness that can occur if live salmonella bacteria enter the body -- usually through food. Most reported outbreaks of food-born illness are caused by bacteria, and salmonellosis is the most common bacterial food-borne illness. Salmonellosis is usually preventable.

### How can salmonella bacteria on raw meat, poultry make people sick?

First, "food abuse" allows bacteria to survive and often to multiply. For example, if the meat knife is used to cut the salad lettuce without first being washed, the lettuce can be contaminated by any bacteria on the meat. The person who eats the salad then also eats the bacteria.

Next, if the bacteria survive the stomach acid, they reproduce themselves in the small intestine. One cell becomes two, two become four, four become sixteen and so on. When there are "enough" bacteria, they cause a salmonella infection.

### How many bacteria does it take to make people sick?

There is no exact number, but the more bacteria consumed, the more likely a person is to get sick. Healthy adults have eaten food containing millions of bacteria without getting sick. Other people have gotten sick from as few as 10 bacteria in the food.

### What are the symptoms of salmonellosis?

According to the Centers for Disease Control, stomach pain occurs within 6 to 48 hours after the food was eaten. Most people get diarrhea, and many people have upset stomachs, chills, fever or headache. Most people feel better within 3 to 5 days. Many persons with salmonellosis may believe they have the flu and may never see a doctor.

### **How many people get sick from salmonellosis?**

At least 40,000 salmonella infections are reported every year, but experts believe that between 500,000 and 4 million persons each year actually contract salmonellosis.

### **How does the doctor know a person has salmonellosis?**

The only way to tell for sure is to conduct laboratory test on the stools of the person who got sick, a process that takes several days.

### **How many people die from salmonellosis?**

Salmonella infections can be life-threatening for the very young, the very old and for persons already weakened by other serious diseases, such as AIDS. Reports show about 2 deaths for every 1,000 known cases of salmonellosis, but experts believe that about 500 persons each year actually die from salmonella infections.

### **What foods are most likely to make people sick?**

Foods don't make people sick -- bacteria do. Any raw food of animal origin -- meat, poultry, raw milk, fish, and shellfish -- may carry salmonellae. The bacteria can survive to cause illness if these specific foods are not thoroughly cooked. the bacteria can also cause illness if they contaminate any other food that comes in contact with the raw food, either directly or by way of dirty hands or dirty equipment. Salmonellosis is a world- wide, food-chain problem that can't be "blamed" on any one food.

### **Anti-Salmonella Strategy**

Bacteria on raw foods of animal origin do not have to cause illness. Investigations of actual outbreaks reported to the Centers for Disease Control show that:

***bacteria + food safety mistakes can = illness.***

Errors during food shopping, transport, preparation, serving, or storage can enable bacteria to grow or even just survive. If foods are prepared a day or more ahead of time and food handlers make mistakes, the chance of illness can increase, because bacteria have more time to multiply. In outbreaks traced to bacteria or other organisms in meat or poultry, one or more of the following eight food handling mistakes enabled bacteria on raw products to survive and cause food-borne illness:

•Improper cooling •Improper hot storage of cooked foods •Undercooked •Cross-contamination of cooked foods by raw foods •Inadquate cleaning of equipment •Infected person touching cooked food •Eating raw meat or poultry •Inadequate reheating of cooked and chilled foods

Therefore, the key to preventing illness -- at home, in a restaurant, at a church picnic, anywhere -- is to destroy the bacteria. Below are some hints, based on information from actual outbreaks, that can destroy or stop growth of salmonella bacteria and other bacteria that can cause illness.

**CLEAN IT.**

Salmonella bacteria can survive in water, soil, and on the kitchen counter, so sanitation can make a big difference -- especially in preventing bacteria that could be on raw products from contaminating other foods. (This is called cross-contamination.)

\* **Wash your hands frequently with SOAP and water for at least 20 seconds** -- after you use the bathroom, before you start food preparation, before you start working with a new food or a new tool, when you finish food preparation, and before you serve food.

\* **Prevent cross-contamination.** Never let raw meat and poultry, or their juices, come into contact with cooked meat or any other food -- raw or cooked.

\* **If you use a dishcloth for cleaning kitchen surfaces, switch to a clean one after you work with raw meat or poultry.** Choose a type that will stand up to a laundering in hot water and bleach. Otherwise, use paper towels and throw away after use.

\* **Cut raw meat or poultry on an acrylic cutting board that is thoroughly cleaned** after each use. Use that favorite (but porous) wooden one only for cutting bread or vegetables.

\* **Wash cutting boards, knives, counter, and other implements with detergent and hot water** immediately after you use them with raw meat and poultry.

\* **After washing and rinsing equipment and counter, professional food service workers also sanitize and rinse them.** Consumers who want to sanitize implements after washing can use a solution of 2 to 3 teaspoons household bleach in 1 quart of water, followed by a cold water rinse. (Note: Sanitizing doesn't work on dirty surfaces, so clean them first.)

\* **Serve cooked meat and poultry on clean plates.** When you replenish the banquet, replenish the serving plates. Don't put grilled meat or poultry back on the plate with raw juices.

\* **Keep pets and other animals away from food,** and away from cooking and eating surfaces and equipment. Squirrels and mice contaminate, as do insects.

**COOK IT.**

Salmonellae -- however many there are -- do not survive when beef or pork is cooked to an internal temperature of at least 160 degrees F, or when poultry is cooked to 185 degrees F. (Some experts believe that this country's passion for rare beef explains why beef -- which carries very low levels of salmonella bacteria -- is involved in more reported salmonellosis outbreaks than poultry.) Always cook meat and poultry thoroughly, and be just as careful when micro waving as when using traditional ovens.

\* **Using a meat thermometer** to check "doneness." If meat is too thin for a thermometer, follow the recipe and cook till the juices are clear.

\* **Never interrupt cooking** -- it's a "half-baked idea" that can make you sick. After thawing foods in the microwave, cook them immediately.

\* **If reheating** leftovers, cover and reheat thoroughly to 165°F just in case bacteria survived in the food during refrigeration or freezing. Let sauces and gravies reach a rolling boil.

\* **Don't store the latecomer's cooked meat and poultry dinner in an off or warm oven.** Hold the food above 140°F. (But, within 2 hours after cooking, refrigerate the food.)

### **COOL IT.**

Refrigeration and even freezing do not kill all salmonella or other bacteria, but proper cooling can usually prevent salmonellae from multiplying.

\* **Refrigerate raw meat and poultry as soon as possible** after you take it out of the grocery meat case. Ice it down in the camp cooler

\* **Refrigerate food containing cooked meat or poultry within 2 hours after cooking.**

\* **Refrigerate or freeze cooked meat or poultry casseroles in covered shallow pans** rather than deep pots. leave space around the containers to let cold air circulate.

\* **Never thaw frozen meat and poultry on the kitchen counter.** Thaw it in the refrigerator or, if you are in a hurry, in a bag under cold running water. It will thaw in a cooler.

\* **Remember that refrigeration or freezing cannot be counted on to kill many salmonella bacteria.** it can't "fix" a mistake such as leaving cooked turkey at room temperature for more than 2 hours -- it can only postpone the risk of illness. If in doubt, throw food out.

**BREAKFAST CASSEROLE***InterNet*

Yield: 6 Servings

**8 lg. Eggs**  
**2 lb. Sausage, bulk**  
**2 1/2 c Milk**  
**1/2 lb. Mushrooms, fresh**  
**3 c Bread cubes**  
**1 lb. Cheddar, grated-(see note)**  
**1 t Mustard, dry -(or more to taste)**

Brown the sausage in a frying pan; drain off excess fat. Set aside.

In a large bowl, beat the eggs. Add milk, mustard and bread cubes. If you like salty dishes, add a teaspoon of salt. Wait a few minutes for the bread cubes to absorb the milk and eggs. Stir in 80 percent of the grated cheese. Add the cooked and drained sausage. Mix well. Pour into a casserole dish of the size that you would use to make lasagna (about 9 x 13 inches).

Slice the mushrooms and arrange the slices on top of the casserole. Sprinkle the remaining 20 percent of the cheese over the top of the mushrooms. Bake for 45 minutes at 350 degrees F. Let cool 10 minutes before serving.

## NOTES:

\* You can cut up your own bread for the bread cubes, or else buy a package of commercial poultry stuffing. Try to get unflavored bread cubes if you buy them.

\* For the sausage, try Spanish chorizo, English Cumberland sausage, or American pork whole-hog sausage. I usually use a mixture of beef chorizo and Jimmy Dean pork sausage. Any spicy pork- or beef-based sausage will work.

\* For the cheese, the best bet is Canadian sharp white cheddar. You can substitute any cheddar, or Leicester, or Cantal, or for that matter anything you want. I've never tried it with Swiss cheeses.

## Trail Meals:

Trail foods should be quick or no-cook foods for a fast, sit and eat or eat while walking meal. Here are a couple of tables for pick and mix meals. Pick and bag for each meal or keep in a large bag for the trail. Remember that what you don't eat the first couple of days will be left for the last. If you plan for 7 days, don't eat it all the first three.

Make sure the Scouts don't pack food in the same place as their socks and underwear. Food and patrol cooking gear go in the top of the pack, and personal gear in the bottom and the side pockets. Reserve one side pocket for trail munchies: nuts, dried fruits, smarties, hard candies and chocolate bars. Each Scout should have his own bagful to ration out to himself so that it lasts the duration of the trip. Our favorite is GORP balls; chopped dehydrated fruits and nuts "glued" together with honey, peanut butter and melted chocolate chips and rolled in icing sugar.

All ingredient amounts are just suggestions; add more or less. It's very free form. You might have your own secret ingredients. Go for it!

**1 large onion, sliced/diced**

**2-3 cloves garlic**

**1/2 green pepper, diced**

**1 tbs. oil**

Sauté above in the oil in bottom of Dutch oven until onions are tender.

Add: **2 lb. lean ground beef** Brown thoroughly, salting and peppering to taste. Drain off excess fat. Add: **2 sm. cans tomato paste.**

**1-2 large cans tomatoes** (you can substitute a large jar of spaghetti sauce for the tomatoes and paste). **3 tbs. chili powder** (or more, depending on how hot you like it).

Simmer uncovered for 45-60 minutes, cooking off some of liquid. When thickened, add:.

**Drained kidney or black beans** (as many as you like; I suggest 2 soup-size cans)..

Cover and simmer 15 or so minutes. .

Serve with rice or pasta, and salad. Use another Dutch oven to make corn bread. Hot sauce on side is good, too. I showed my Scouts how to cook this shortly after I started as SM., and my senior patrol cooks it frequently on camp outs now. They scarf it down by the plateful and want more. There rarely is any left over. . Mmmmmmm...I'm getting hungry. Enjoy!

*Stir-Fry Jerky**Nikki Schmitt***DRIER**

A quick meat Jerky can be made using Stir-Fry meat from the grocery. The meat is already cut into strips by the butcher. Marinate the meat with Teriyaki or Soy sauce in a glass pan overnight. Dry in a dehydrator for about 6-8 hours. Pat with a paper towel to remove oil droplets. Place in a zip-lock bag and store in the refrigerator until ready for the pack.

Also try a Italian dressing marinate for a different taste.

- 6 oz butter (real, not margarine)**
- 2 each egg yolk**
- 3/8 cup heavy cream**
- 3/4 cup grated Parmesan cheese**

Add egg Yolks and cream and beat until well blended and fluffy (if your arm doesn't hurt, you didn't beat it enough). Add the cheese a little at a time, beating after each addition. Set butter mixture aside (if it's hot out, put it in the cooler). Cut the chicken into bite size pieces.

When the water comes to a boil, dump in the noodles. boil for 5 to 8 min. Fish out a noodle and eat it to tell when they are done. DO NOT OVER COOK! (Beat the sauce some more while you are waiting for the noodles) When the noodles are done, drain the

water immediately and dump in the butter mixture and the chicken. Stir gently until the sauce is mixed in, serve immediately. Eat it!

NOTE: if you are short of money and have the time, boil a whole chicken and take the meat off the bones instead of using chicken breasts. This can be done ahead of time at home.

*Cajun Meatloaf***DUTCH OVEN**

From Monday Is Meat Loaf, The Everyday Cookbooks (Time-Life Books, \$14.95).

- 1** tablespoon olive oil
- 1** medium onion, coarsely chopped
- 4** garlic cloves, minced
- 3** tablespoons chili powder
- 1** teaspoon paprika
- 1/4** teaspoon salt
- Pinch** of cayenne pepper
- 1** cup tomato juice
- 2** eggs, lightly beaten
- 2** tablespoons Worcestershire sauce
- 1/2** teaspoon sugar
- 1/4** teaspoon hot pepper sauce
- 1** pound each: ground beef or ground turkey and ground pork
- 2** slices whole-wheat or white bread, torn into small pieces

Preheat oven to 350 degrees. Warm oil in large skillet over high heat. Add onion, garlic, chili powder, paprika, salt and cayenne. Cover, reduce heat to low and cook, stirring occasionally until onion is softened but not browned, about 10 minutes. Remove skillet from heat, stir in the tomato juice and set mixture aside to cool slightly.

Combine beef and pork in large bowl. Add bread, eggs, Worcestershire, sugar, hot sauce and onion mixture; mix lightly but thoroughly. Place mixture in a 9-by-5-by-3-inch loaf pan. Bake 55 minutes or until a meat thermometer inserted in the center registers 160 degrees. Let stand 5 to 10 minutes before slicing. Serves 6.

Note: Ground turkey can replace either the beef or the pork. If you use a combination of turkey and pork, which will be more delicately flavored than meat loaf made with beef, reduce chili powder to 2 tablespoons and use tomato-vegetable cocktail juice instead of plain tomato juice.

## ONE POT DINNERS

The idea is to create a stew or casserole in one pot. A mixture of starches, proteins, vegetables, and spices or a delectable sauce can become a gourmet feast. The following recipes are examples. Use the Chart to help create your own specialties.

One pot dinners can be easy to prepare with a little thought before hand. Which foods need to cook longer? - Start them first. How much water is needed? - Is the pot big enough?

Try to maintain texture in the food. Mush is mush and no amount of spices will dress it up. Plastic freezer bags can serve for carrying and mixing items such as instant potatoes. Reduce the cleanup, add the boiling water to the bag and mix. This works with quick rice as well.

### Directions:

1. Select and assemble your ingredients from the grocery store, camping outlet or food co-op. Amounts of each ingredient can be adjusted to suit individual preferences and appetites.
2. Determine the order of preparation based on the cooking times of each ingredient. Items with similar cooking times and methods may be dumped together in a plastic bag. Put the bulkiest or main items in a large bag, and put the other items in smaller bags and seal them. Place these smaller bags inside the large bag and seal it.
3. Check the instructions for each component to be sure you include any extra items such as butter, dry milk, etc. that are needed.
4. Decide how much water you need to start with based on what is needed for each ingredient.
5. Write instructions for each package in the meal down, based on the items determined above. Include order of preparation, cooking times, ingredients not included in the bags, etc.
6. Include the instructions for each package with the package. Include the instructions for the whole meal with the large bag, in addition to the instructions for that bag.
7. Label each bag
  - i.e. Large bag can be labeled "dinner Day 3" with list of contents  
Orange drink, chicken soup, Mac & cheese, chocolate pudding  
Inside might include separate bags for drink, soup, and pudding. Instructions can be written on bags with a marker that will **NOT WASH** off or cut from boxes and placed in bag.

As you may tell, the above meals are a mixture of freeze dried (F.D.) and store bought foods. These are included as both a source of prepared trail meals and as suggestions for the possibility of doing your own from the grocery store.

Another Grocery Item is called **TVP** for **Textured Vegetable Protein**. This Soy based product is imitation meat such as BACOS. The product can sometimes be found in the health foods or specialty sections. It can be found as "beef, ham, chicken, or bacon". It is a lower cost substitute for Freeze dried meats. But I would always plan to add a well seasoned sauce. Or try to rehydrate in bouillon broth. Some **TVP** must be cooked, while others like BACOS are ready to eat.

## Cooking with coals..

Coals are produced in two ways. Charcoal comes in bags not suited for backpacking but great for car camping. Place the Bag in a 5 gal. bucket to keep dry. The other method is producing coals from a wood fire. Hardwoods make better coals than softwoods such as pine. Twigs do not produce coals very well, if at all. 1 1/2 - 2 inch thick limbs make better coals. They are small enough to burn down, and large enough to make coals.

The cooking can be done directly on the coals using foil wrapped food or Dutch Oven, or use a grate over the coals. The temperature can be determined by holding the back of your hand over the coals. Allow 30-40 minutes to get the coals ready before cooking.

		8" cast iron 12"				
Approximate Temperature	Type of Fire	coals				Seconds over fire
		Under / Top	Top	Under	/	
250-325 degrees	slow	2	4	3	5	6-8
325-400	Medium	3	5	4	6	4-5
400-500	Hot	4	6	5	7	2-3
> 500	Very Hot	5	7	6	8	1

All Dutch oven cooking is done by hot coals, never in a flaming fire. The coals may be from hardwoods like oak and hickory or from charcoal. Hardwoods yield long-burning coals which are necessary for the lengthy cooking process in most Dutch oven recipes. Soft woods like pine are unsatisfactory.

Charcoal is more convenient to use and is necessary in areas where there is no downed hardwood. Use a firepan under the coals to prevent killing ground cover. The pan can be metal or plywood with a thick layer of mineral soil (sand). Three or four stones can be used to prop up the pan above the ground.

The amount of charcoal needed will vary with the weather (wind and temperature)

- 2 ounces each: crimini and button mushrooms**
- 1 cup milk**
- 6 slices fresh white bread, crusts removed**
- 3 tablespoons butter**
- 2 pounds ground beef chuck**
- 1 pound ground pork**
- 2 teaspoons salt**
- 1 bunch fresh chives, diced**

Preheat oven to 350 degrees. Purée shallots and mushrooms in food processor; set aside. Combine bread and milk in large mixing bowl, and mash with hands until milk is absorbed and mixture has a smooth texture. Heat butter in skillet and sauté shallot-mushroom purée about 3 minutes until tender.

In large mixing bowl, combine mushroom mixture, bread, chuck, pork, salt, pepper, onion and garlic powders, chives and egg; mix by hand until evenly blended. Transfer mixture to a 9-by-5-by-3-inch loaf pan and pound on table to remove any air bubbles. Cover with foil. Bake about 1 hour until slightly browned on top. Remove foil and glaze top with ketchup.

Return to oven and bake 10 minutes more, until browned. Remove from oven and let rest 15 minutes before slicing. Serve with additional ketchup. Makes 4 to 6 servings.

## Camp Breads

### *Bannock*

### *Ancient Trailperson's Standby*

**1 cup flour**  
**1/3 tablespoon (1 teaspoon) baking powder**  
**dash salt**  
**oil or margarine**  
**water**

*At home:* package the flour, baking powder, and salt together in a large, tough plastic bag.

*In the field:* Put a little oil or margarine into the bag, and slowly add enough water to give the mixture the consistency of dough. You may have to mix it with your hands. Flatten it out into a cake, and fry it in a little oil, very slowly. Note: If you end up with a bread that has its outside a delicious, golden brown and its inside a uncooked, doughy mass, do not despair. Just pretend you're an ancient trailperson.

### *Bisquick Bannock*

### *Modern Trailperson's Standby*

**6-8 tablespoons water**  
**1 cup Bisquick buttermilk baking mix**  
**3 Tablespoons oil or margarine**

*At home:* Package the baking mix in a large, tough plastic bag. *In the field:* Put a 3-4 Tbs. oil or margarine into the bag, and slowly add enough water to give the mixture the consistency of dough. You may have to mix it with your hands. Flatten it out into a cake, about 1/2 inch thick and fry it in a little oil, very slowly over coals or lowest possible flame. Fry it, as gently as possible, turning it often. After the bottom is browned, prop the pan up in front of the fire's flames to brown the top.

1. The batter should not be too thick - 1/2 inch is enough
2. Use straight sided fry pan, curved sides allow slips when propped before the fire.
3. Aluminum skillets get too hot too quick.
4. Don't prop up the pan until the bottom is browned.

Also try putting the dough in a zip-lock freezer bag. Place on rack in covered pot of boiling water. Let the steam 'bake' the bread. Add raisins and cinnamon, or serve with honey when done.

*Rayado Biscuits**Dutch Oven***Biscuit Mix  
Flour**

Mix 12 - 18 oz biscuit mix as directed and pat out on a floured, flat surface. Cut biscuits with a small open end can and place 20-24 biscuits in oven. Cover and bake about 15 minutes. Can also use floured hands and balls of dough 1 1/2 ", flatten and placed in oven. Or spoon the mixed dough and drop into oven without shaping.

*Mount Logan Bread*

**3 cups flour (white or whole wheat)**  
**1/2 cup chopped dried fruit**  
**1/2-1 cup shelled nuts (walnuts, pecans, cashews, peanuts)**  
**1 cup honey**  
**3/4 cup wheat germ**  
**1/4 cup brown sugar**  
**6 eggs**  
**1/2 cup powdered milk**  
**1/2 cup raisins**  
**2 Tbs. Peanut oil**

Mix dried ingredients, then stir in oil, honey and eggs. Spray a 9 x 5-1/3 x 2-2/3 inch bread pan with a nonstick coating. Pour in batter and tap the pan on the counter. Bake in a preheated 275 degree oven for 2 hours. Cool 10 minutes before taking out of pan.

Yield: 18 slices.

*Dan Beard Camp Bread*

**2 cups biscuit mix**  
**1/2 cup plus 1 tablespoon milk**

1. Stir the ingredients together; this will make a very thick dough. Add a few teaspoons of milk if necessary. Shape it like a bread loaf, and dust with additional biscuit mix or flour.

2. Grease a large sheet of foil heavily. Place the dough on the foil and wrap it loosely so the foil package will not burst when the dough rises. Wrap the dough loosely again to cover the seams and crimping

3. Place the bread package at the edge of the coals and turn every 10 minutes for about 1 1/2 hours, depending on the intensity of the heat. Yield: 1 loaf

*Indian Fry Bread*

**3 cups flour**  
**3 tsp. Baking powder**  
**1 tsp. salt**

At camp add 1-1/2 1-2/3 cups water... just enough to form a biscuit dough consistency. Knead well until the dough is elastic and doesn't stick. (Have some extra flour available) For 7-8 inch rounds, use a piece of dough the size of a lemon. Pat by hand into a flat round shape. Fry in deep fat, turning once. The bread should be crisp on the outside. Serve hot.

*Cimaron Cinnamon Rolls****Dutch Oven***

**2 6-oz pkg. biscuit mix flour**  
**1 cup brown sugar**  
**3 4-oz raisins**  
**cinnamon**

Mix the biscuit mix as directed and pat out in a rectangular shape on a floured, flat surface. Spread raisins and brown sugar over the dough and sprinkle with cinnamon. With floured hands roll the dough into a cylinder and cut slices from the rolled cylinder. Place in bottom of Dutch oven. Cover with lid and bake about 15-20 minutes. serves 8.

*Hudson Bay Bread*

*Summers High Adventure Canoe Base, Ely, MN*

(a)

**1.5 lb. margarine or butter**  
**2/3 cup Karo syrup**  
**2/3 cup honey**  
**2 tbs. maple flavoring**  
**4 cups sugar**

(b)

**19 cups Quick Oats**  
**1 1/2 cups ground nuts (walnuts, pecans, hazelnuts, almonds or sesame seeds)**

Cream all (a) ingredients together. Add oats and nuts, mixing well. Spread about 1/4 inch thick in sheet pans. Press mixture down in pan. Bake at 350 degrees 18-20 minutes. As soon as the bread comes out of the oven, use a spatula to press it down again. This keeps the bread from crumbling. Cut while still warm: 1 inch squares for snacks and 2 inch squares for trail lunches. Wrap to keep the bread or freeze until ready to use. Peanut butter and jelly are optional.

Can substitute molasses for the honey.
